DIRECTIONS FOR USE

For soil applications, broadcast apply 3 to 6 gallons per acre. This product can be applied through sprayers, sprinkler, or drip irrigation.

For foliar applications, apply one to four quarts per acre in sufficient water for thorough coverage. Always jar test for compatibility if mixing with another fertilizer or any pesticide.

NOTICE Manufacturer makes no warranties, expressed or implied. The buyer assumes all risks associated with the use of this product. In the event of damage resulting from a breach of warranty, the buyer agrees to accept a refund of the purchase price as full discharge of the manufacturers liability.
